

To whom it may concern,

I am wholeheartedly opposed to istening to the NAB's petition 04-160 to limit my ability to listen to locally-oriented content via XM Satellite Radio, primarily regarding its traffic and weather channels. This is not a medium that crosses any local territories or invades any pre-existing providers, as XM Satellite Radio is one-of-a-kind, and provides me a variety and incredible quality that are not available anywhere else. It is an amazing technology tat should have been introduced long, long ago.

This is a service that I pay for - and feel it must not be up to the someone else, regardless of their intent, to tell listeners what they can listen to. Especially if it's a service that I am paying for. Please reject the NAB's petition 04-160 and help listeners like me support the most beneficial XM Radio service.

v/r

John Noss,

Kyle, TX
